# CORE SPECIALTY

## Essential Duties and Responsibilities:

*(Position based in Morristown, NJ or Cincinnati, OH)*

Core Specialty is seeking a Global Security Operations Lead. The ideal candidate will be a senior Security Operations cyber-professional to help solution and lead against an ever-evolving cyber threat landscape and protect critical information assets. Core Specialty has business process operations offshore in India and UK.

## Key Accountabilities/Deliverables:

- Lead the Security Operations strategy, architecture, processes, and controls reporting to CIO.
- Lead the Security Operations team and work with managed service providers to ensure deliverables are met within Service Level Agreements. • Define the Security Operations services and solutions spanning, but not limited to, incident response, Security Event and Information Monitoring (SEIM), penetration testing, vulnerability and threat management, and data protection.
- Coordinate, communicate, and direct the managed service provider Security Operations Center (SOC) leads about process, people and technology requirements and changes related to Security Operations architecture on periodic and as need basis.
- Act as primary point of escalation for the managed service provider SOC lead and management to avoid roadblocks, challenges, and dependencies. • Provide knowledge and act as a subject matter expert on key principles of Security Operations with an in-depth knowledge including, but not limited to, incident response, logging and monitoring, and threat and vulnerability management, attack surface management, threat intelligence, and adversarial simulations.
- Define and periodically review KPIs, compliance and incident reports and analytics based on defined monitoring and incident management parameters. Measure SOC performance metrics, and report on security operations to business leaders.
- Provide global coordination for regional security incidents or operational issues.

## Technical Knowledge and Understanding:

- Should hold at least one of the major security certifications (ex: CISM, CISSP, CISA, CRISC, CCSK, Certified CISO, PMP, etc.) or commensurate experience
- Strong interpersonal and motivational skills.
- Strong analytical skills.

## Experience:

- Technical architecture experience integrating security operations software into clients' infrastructure and applications; Installation, integration and deployment of Security Operations technology (e.g. Palo Alto, Qualys MS Defender, Darktrace), in an operational environment; Internally and externally recognized subject matter expert that influence the way things are done;
- Bachelor's degree IT/IS/Business/Technology is required.
- Minimum 8 years of Leadership and/or Management experience.
- Minimum of 5 years of experience with Security Operations Center technologies and processes, incident response, threat and vulnerability management; Managing projects through the full system development lifecycle; Developing, implementing or architecting information systems; Demonstrate consulting skills, with IT Security concepts and strategies, including communication, culture change and performance measurement system design; Embrace and lead change; effectively and cultivate an environment of security driven thinking, innovation, experimentation, rigor and continuous improvement; Results oriented, high energy, inspirational and self-motivated leader; Led global teams in successful organizations.
